DECISION ON PETITION
TO MAKE SPECIAL
(ACCELERATED EXAMINATION)
UNDER M.P.E.P. §708.02 (VIII)

This is a response to the petition filed 21 March 2005, under 37 C.F.R. §1.102(d) and M.P.E.P. §708.02 (VIII): Accelerated Examination, to make the above-identified application special.

The Petition is **DISMISSED**.

M.P.E.P. §708.02, Section VIII which sets out the prerequisites for a grantable petition for Accelerated Examination under 37 C.F.R. §1.102(d) states in relevant part:

A new application (one which has not received any examination by the examiner) may be granted special status provided that applicant (and this term includes applicant's attorney or agent) complies with each of the following items:

- (a) Submits a petition to make special accompanied by the fee set forth in 37 CFR 1.17(h);
- (b) Presents all claims directed to a single invention, or if the Office determines that all the claims presented are not obviously directed to a single invention, will make an election without traverse as a prerequisite to the grant of special status;
- (c) Submits a statement(s) that a pre-examination search was made, listing the field of search by class and subclass, publication, Chemical Abstracts, foreign patents, etc. The pre-examination search must be directed to the invention as claimed in the application for which special status is requested. A search made by a foreign patent office satisfies this requirement;
- (d) Submits one copy each of the references deemed most closely related to the subject matter encompassed by the claims if said references are not already of record; and
- (e) Submits a detailed discussion of the references, which discussion points out, with the particularity required by 37 CFR 1.111 (b) and (c), how the claimed subject matter is patentable over the references.

In those instances where the request for this special status does not meet all the prerequisites set forth above, **applicant will be notified and the defects in the request will be stated**. The application will remain in the status of a new application awaiting action in its regular turn. In those instances where a request is defective in one or more respects, applicant will be given one opportunity to perfect the request in a renewed petition to make special. If perfected, the request will then be granted. If not perfected in the first renewed petition, any additional renewed petitions to make special may or may not be considered at the discretion of the Technology Center (TC) Special Program Examiner.

The petition filed 21 March 2005 fails to adequately meet requirement (e) of the criteria set forth above. The discussion of the references does not point out with the particularity required by 37 CFR 1.111(b) and (c) how the claimed subject matter is patentable over the references. The discussion of the references is confusing. Petitioner states that the references "fail to disclose or suggest authorizing data insertion and access to data in a database, if access attribute information is an insert-only attribute, *and/or* specifying at least an attribute of data update prohibition to the database, *and/or* disabling change of the attribute after the attribute is specified" (emphasis added). I.e., the references fail to disclose at least one of six alternatives. This statement is not a sufficient detailed description. The detailed discussion should be directed to how the language of **each** of the independent **claims** is **specifically** distinguishable and patentable from **each** of the **references** provided in requirement (d) above. Additionally, the discussion states that all of the independent claims recite at least one of the features identified above and that in particular "claim 8 recites means for, if said database definition request is a first specification of an insert-only attribute". However, the feature recited as not being shown by the references is that of "if access attribute information is an insert-only attribute", not "if said database definition request is a first specification of an insert-only attribute".

Petition to Make Special **DISMISSED**.

Petitioner is given one opportunity to perfect the petition. Any request for reconsideration must be filed within TWO MONTHS of the mail date of this decision.

Until the renewed petition is submitted, the application will be returned to the examiner's docket to await treatment on the merits in the normal order of examination.
